Projects

Streamosaurus | URL: <http://andybarringer.me/streamosaurus/>

Repository: github.com/wabarringer/streamosaurus

- Used multiple public API to relay data on streaming service availability, movie/show details and reviews.
- Designed and implemented a responsive UI using advanced CSS.
- Implemented a thorough understanding of javascript and jQuery to add full search and browsing capability.

Anoma Drama Llama | URL: anoma-drama-llama.herokuapp.com/

Repository: github.com/wabarringer/Anoma_Drama_Llama

- Utilized MySQL and Sequelize to construct a mood tracker and social media website.
- Implemented a digital pet feature using JavaScript and Sequelize.
- Used ERD knowledge to build a sizable database for storing user data; including mood, digital pet customization, and journal entries.

Friends In Check | URL: friends-in-check.netlify.app/

Repository: github.com/wabarringer/project-3-FRONT

- Used React to make a multiplayer chess web app.
- Utilized Socket.io to create multiplayer functionality and chat
- Created routes for friends, stats and profiles by following RESTful API guidelines.
- Utilized multiple repositories for React, serve and Socket.io to maintain separation of concerns.
- As GitHub manager, consistently utilized communication and organizational skills to meet project goals, tasks and solve issues, while also implementing merging guidelines to avoid conflicts.
